

INVISIBLE TERRACE FIXINGS IDEAL FOR ACCOYA[®]

CREATED FROM SUSTAINABLY SOURCED WOOD AND COMPLETELY NON-TOXIC, ACCOYA[®] IS A REVOLUTION IN WOOD TECHNOLOGY.

The made in the USA DeckWise® invisible terrace fixing clips have been the preferred choice of builders for biscuit style fixing methods that incorporate a stainless steel insert for reinforcing properties. This terrace fixing clip design was originally patented by the DeckWise® founder in 2004 in the USA as an alternative to top side terrace plank fixing.

The stainless steel insert provides perfect positioning of the screw head and the surrounding high hardness polymer resin adds

long-lasting UV protection. The outer casing is manufactured from a UV resistant, high-strength polymer material - polypropylene and polyethylene and incorporates an integrated spacer wedge leg for consistent gap spacing.

Known worldwide as an invisible fixing that guarantees an efficient method for fixing terrace planks backed by proven technology. Many try to imitate the DeckWise® design however no other invisible fixing provides the high end beauty and smooth beautiful surface as the DeckWise® clip.

1. Stainless steel insert is coated for optimal resistance and anti-corrosion
2. Polymer coating resistant to UV and different climate conditions
3. 3 color choices to perfectly hide between planks for optimum concealing
4. High grade stainless steels screws penetrate terrace planks and the underlying joist

5. Unique 45° screwing process through the clip secures planks for natural movement
6. Integrated spacer wedge available in 3 sizes: 2,4-mm, 4-mm or 6,4-mm gap spacing
7. Spacer wedge provides automatic and regular spacing during terrace installation
8. Symmetrical grooved plank profile allows blemished planks to be reversible

KEY FEATURES

DIMENSIONALLY STABLE

OUTSTANDING DURABILITY

IDEAL FOR COATING

Accoya® wood is produced from sustainably sourced, fast growing wood and manufactured using Accsys' proprietary patented modification process from surface to core.

BAREFOOT FRIENDLY

NATURALLY INSULATING

EXCELLENT MACHINABILITY

INSECT BARRIER

CONSISTENT QUALITY THROUGHOUT

NATURALLY BEAUTIFUL WOOD

FROM SUSTAINABLE SOURCES

RETAINED STRENGTH & HARDNESS

NON-TOXIC & RECYCLABLE

ACCOYA®

Accoya wood is created from readily available sustainably sourced non-durable woods that are modified to match or exceed the durability, stability and beauty of the very best tropical hardwoods.

The Accoya® wood production process that 'enables nature', creates a new durable, stable and beautiful product - that has the very best environmental credentials.

The exceptional properties of durability, stability, strength and beauty have even led to Accoya® wood being used as the main construction material in a heavy traffic road bridge with a highly original design.

Accoya® is helping to protect the world's precious hardwood resources and is guaranteed for 50 years in exterior use and 25 years when used in the ground. This long life also provides an added benefit - helping to reduce carbon emissions by delaying the point at which wood breaks back down again into CO2 and its other base components.

Accoya® wood creates beautiful and sustainable possibilities, even in demanding applications.

PERFECTLY MATCHED FOR ACCOYA[®] CONTRACTORS & DIY'ERS

The DeckWise[®] terrace fixing system is perfectly suitable for outdoor use with Accoya[®]. Our innovation and technology led us to create the ideal system for professional contractors and DIY homeowners looking for solutions to decrease installation time and increase profits.

Terraces tend to last longer when built with our invisible fixings because this system uses single edge-mount installation which allows terrace planks to expand and contract naturally with many harsh regional climate changes. This ultimately lessens the stress on the planks and keeps them in good condition for a very long time.

Fixings fit precisely into the grooved slot of the Accoya[®] terrace planks thanks to our unique symmetrical and reversible plank profile. Planks can be ordered pre-grooved or grooved on the job site with common wood working tools.

Furthering our footprint into all things hardwood, DeckWise[®] also supplies a full line of terrace and cladding tools, accessories and products for beautifully smooth, and family friendly living spaces that will last for generations to come.

DeckWise[®] has met their demands with "Tough Solutions For Tough Decks!"

ADVANTAGES OF DeckWise® TERRACE CLIPS

DeckWise® invisible fixing kits are delivered in full installation kits including all installation components for a high-quality terrace.

Shape & Design: The size and shape of the square biscuit style fixing fits snugly inside pre-cut plank side slots. Its small size allows for a less obtrusive fixing between gaps, while still offering extreme hold down control. Its flat head allows for approximately 25mm of contact area inside the plank's edge slot groove.

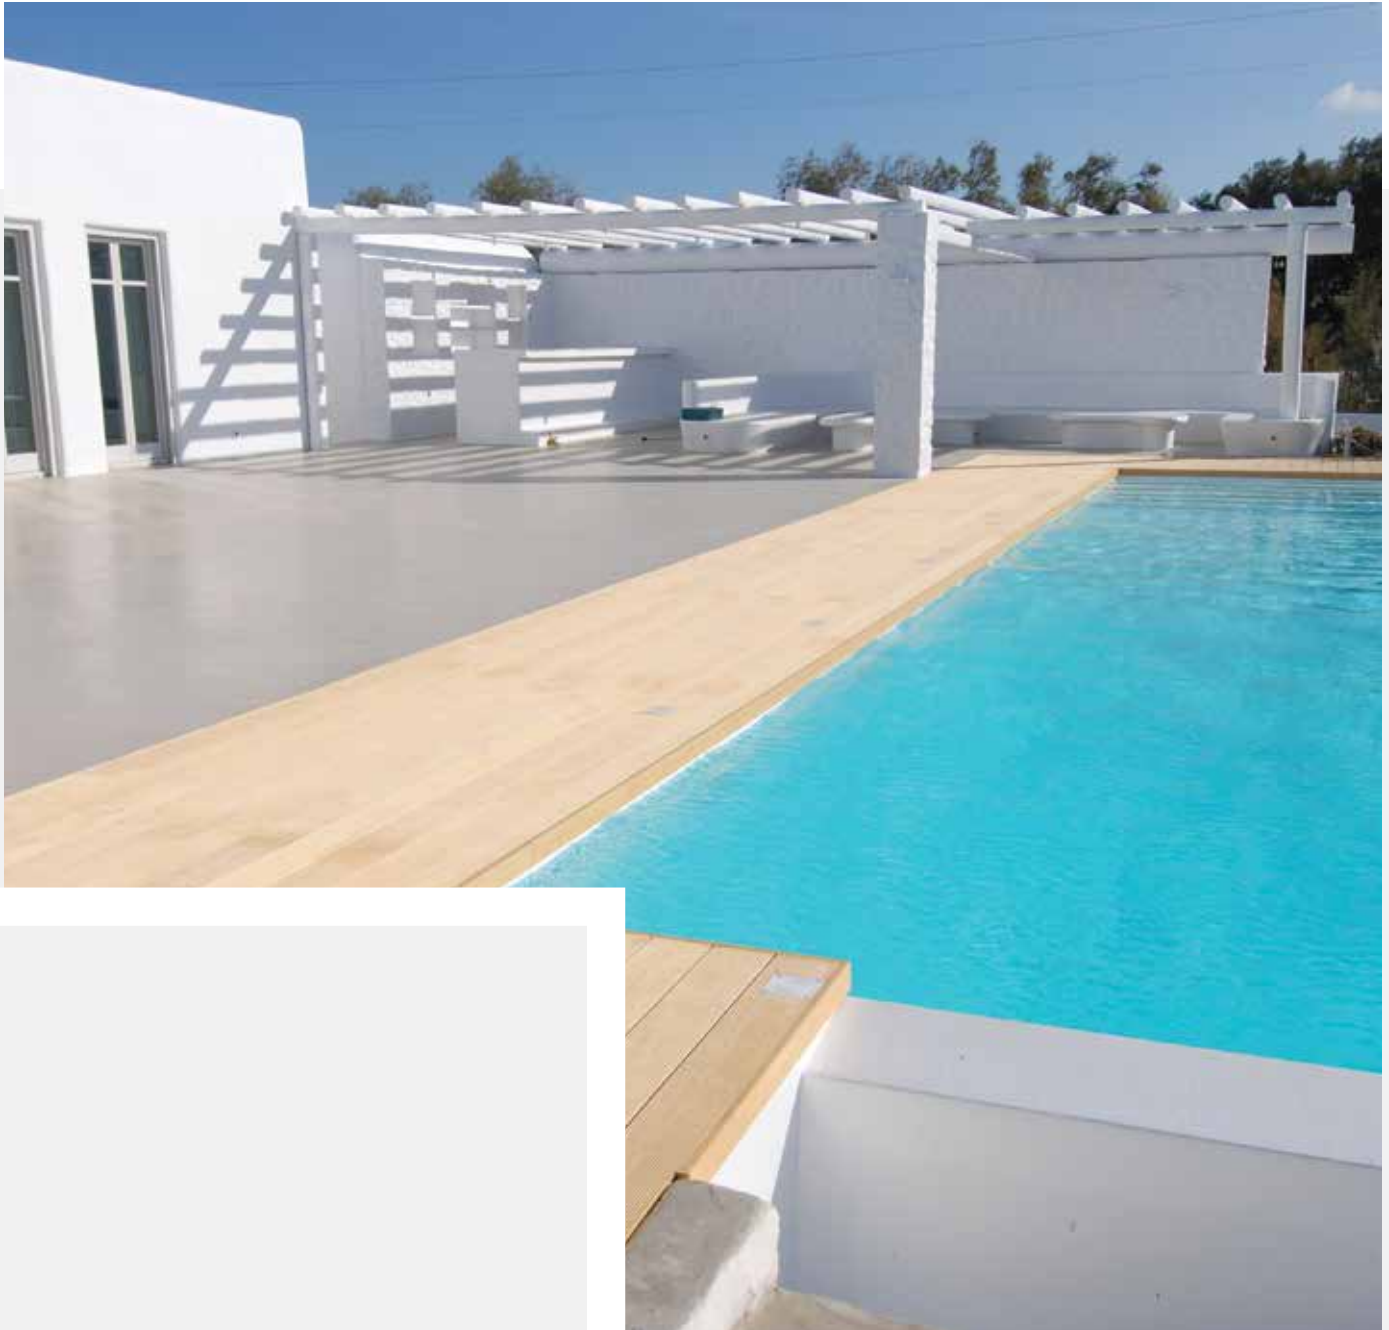

Other unseen fixing methods do not allow for much tolerance in the cutting of the edge slots, which complicates and slows installation. Furthermore, odd shaped clips tend to gather more debris and moisture which can make them more susceptible to failure.

Color: Available in "Hardwood Brown", "Composite Grey" or "Shadowline Black" to match many desired terrace surface finishing results. Each color will add specific characteristics to exceptionally conceal the fixing clip between the plank gaps to produce a flawless finish.

Tips: Unlike other terrace building systems and kits, each box of DeckWise® invisible hardwood clips contain a 3,2mm pre-drill bit and a T15 - star drive screw gun tip needed for installation. All kits are available with a standard stainless steel screw with a painted black T15 star tip drive or with a hardened self-drilling screw.

Options: The DeckWise® unseen hardwood terrace clip kits may be purchased in multiple combinations of clip colors, screw types, lengths and head colors, screw bits and tips and spacer wedge sizes. Likewise, hardwood plugs used for starter planks and face screwing applications can be purchased in larger ranges.
